Speed Dome Network Camera

SD7313

Outdoor · 35x Zoom · EIS · WDR

VIVOTEK's SD7313 (NTSC) / SD7323 (PAL) is the latest high performance speed dome network camera integrated with a 35x zoom lens and SONY Exview HAD CCD sensor. With its powerful zoom capability, this camera offers close-up images of distant objects in sharp detail. It is designed for professional outdoor surveillance applications where high reliability, sharp images, and weatherproofing (IP66 rated) are required.

Along with the high sensitivity SONY Exview HAD CCD sensor and incorporating a removable IR-cut filter, the SD7313/7323 is capable of detection at near infrared light region with great proficiency, drastically improving light sensitivity, especially during nighttime. The WDR function enables the SD7313/7323 to generate identifiable images, overcoming the difficulties of challenging lighting conditions.

Featuring EIS (Electronic Image Stabilization), the SD7313/7323 can mitigate the influence of vibration caused by winds or camera rotation so as to ensure stable and recognizable image quality at all times. The 3D privacy mask function guarantees that private areas are completely sheltered even when the camera pans, tilts, and zooms. When zooming in, the privacy mask will be enlarged to provide comprehensive blockage of the private area. In addition, the SD7313/7323 incorporates an SD/SDHC card slot so as to offer temporary on-board recording*.

Similar to the advanced features of VIVOTEK's other cameras, the SD7313/7323 includes 3GPP mobile surveillance, dual-codec, dual-stream, two-way audio via SIP protocol, digital I/O, 802.1X authentication for network protection, and USB joystick for remote PTZ control. With the VIVOTEK SD7313/7323, these exceptional features provide efficient operational flexibility to meet customers' needs in surveillance applications both outdoors and indoors.

* No SD/SDHC card slot & local storage function for Argentina.

The Ultimate in Outdoor Surveillance

Astonishing Light Sensitivity

SD7313/7323 adopts a SONY Exview HAD CCD sensor capable of detecting and utilizing near infrared light for higher light efficiency. As a result, the sensor can provide superior image quality under poor lighting conditions compared to a conventional CCD sensor, especially during nighttime.

Conventional CCD

Exview HAD CCD

Remarkably Close-up Images of Distant Objects

Utilizing a 35x optical zoom lens, the SD7313/7323 can provide close-up images with exceptional detail and effectively extends your viewing distance. You can easily and quickly zoom in on distant objects or minute targets with unprecedented precision and quality, even when enlarged.

35x Zoom

Adapted for High-contrast Lighting Conditions

SD7313/7323 offers a WDR (Wide Dynamic Range) function that delivers identifiable images in high-contrast environments such as backlight, glare, and light reflection. By capturing and combining information from the darkest and brightest areas of the environment, the SD7313/7323 generates images that accurately reproduce fine details appearing in the actual scene.

Normal

WDR

Clear Images 24/7

SD7313/7323 delivers true day & night functionality with a built-in removable IR-cut filter. By day, the IR-cut filter screens out infrared light to reduce color distortion, and at night, the filter is removed to enhance light sensitivity.

Day

Night

Stable Image Quality during Vibration

SD7313/7323 is incorporated with the EIS (Electronic Image Stabilization) feature that maintains image quality during wind- or traffic-induced vibration. Through correction of the image position caused by shaking or movement, the SD7313/7323 guarantees stable and recognizable image quality when placed in high locations, such as on a pole, or in areas with heavy traffic.

Normal

EIS

Maximum Protection against Natural Threats

SD7313/7323's weather-proof IP66-rated housing provides protection from extreme weather conditions, dust, and moisture. It offers total protection against contamination and withstands water jet ingress, allowing SD7313/7323 to operate outdoors without any worries.

Seamless Protection for Private Areas

Unlike conventional privacy masks, the coverage of SD7313/7323's 3D privacy mask changes with the camera movement so as to fully protect sensitive information or areas. When zooming in and out, the privacy mask will enlarge and shrink respectively. As a result, private areas can be completely sheltered even when the camera pans, tilts, and zooms.

Normal

3D Privacy Mask After Zoom In

Strong Video Access Protection

SD7313/7323 supports the 802.1X standard that authenticates the identity of each user requesting to access video images. This function prevents unauthorized or unauthenticated users from accessing important video data, providing a higher level of data security.

Physical Description

Connectors

Pan range: 360° Continuous Rotation
Tilt range: 0°~90° Flip

Product Features

- SONY EXview HAD CCD Sensor in D1 Resolution
- WDR (Wide Dynamic Range) for High Contrast Environments
- 35x Zoom Lens
- 360° Continuous Pan and 90° Tilt
- Removable IR-cut Filter for Day & Night Function
- Real-time MPEG-4 and MJPEG Compression (Dual Codec)
- Simultaneous Dual Streams
- Weather-proof IP66-rated Housing
- EIS (Electronic Image Stabilization) for Ultimate Video Experience
- 3D Privacy Masks for Private Area Protection
- 3GPP Mobile Surveillance
- Two-way Audio via SIP Protocol
- Built-in SD/SDHC Card Slot for On-board Storage*

* No SD/SDHC card slot & local storage function for Argentina.
