

Little Eye - Big Vision

The World's Smallest Ever 5MP Fisheye Network Camera

VIVOTEK is pleased to announce the launch of the high-performance, but low-profile, FE8180. This tiny camera is not only extremely low-profile, with a diameter of only 90mm, but also able to be mounted directly on the wall to capture 180° panoramic views, or on the ceiling for a 360° surround view, with zero blind-spots. A single FE8180 can easily do the job of three to four standard CCTV cameras, dramatically reducing the cost of ownership, while blending in with any interior or exterior.

Flexible Mounting Options

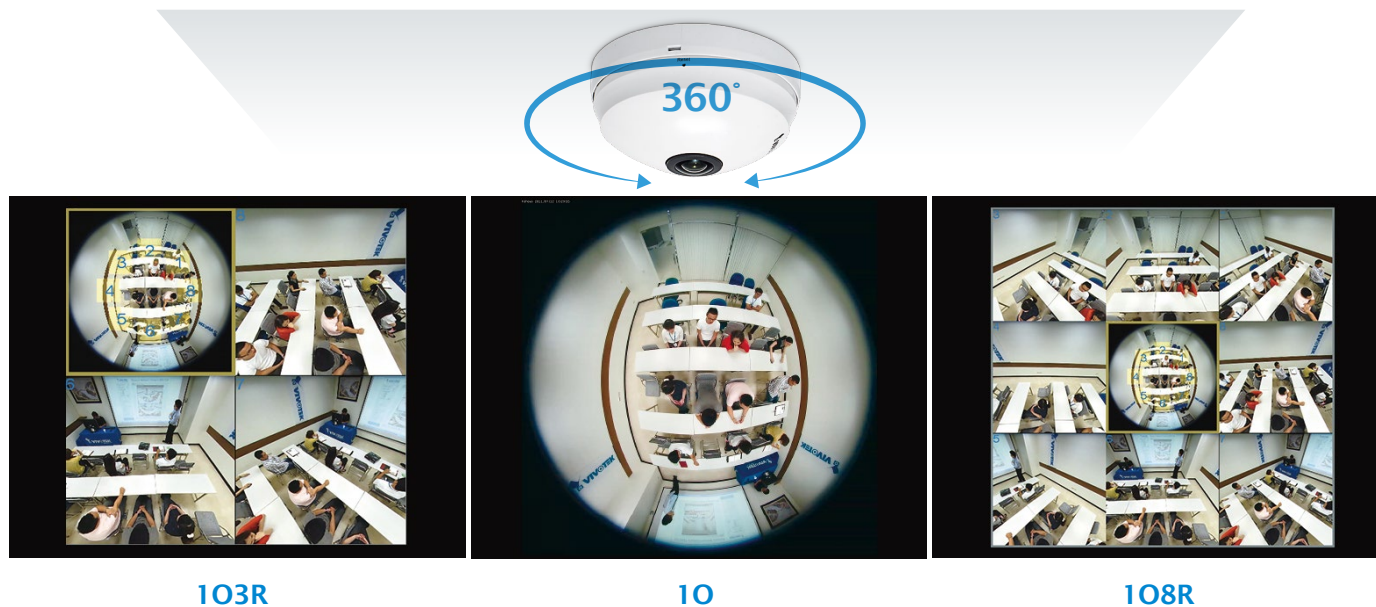

15° Tilt Mount for 180° Panoramic View

The FE8180 can be mounted on any wall and features an ideal 15° tilt mount for 180° panoramic views. With this mounting option, the FE8180 captures high definition, wall-to-wall coverage at the perfect angle for facial recognition.

Ceiling Mount for 360° Surround View

When mounted on the ceiling, the FE8180 provides an expansive 360° surround view, meaning that this tiny camera can deliver an even wider range of coverage – showing you the world, but remaining discrete.

Compact Size

The FE8180 is the world's smallest 5MP fisheye network camera. Ideal for any application which calls for broad coverage but where appearance matters, VIVOTEK's FE8180 blends in with any surrounding, packing the highest-level performance within the lowest-profile camera
