Network Camera ⚡ VIVOTEK
Model No: IP3137 CE 0560 ①
MAC: 0002D1XXXXXX

Note the serial number from the label on the unit.
This serial number is the same as the Ethernet address,
for example: 0002D1000019=00-02-D1-00-00-19

Reset button

2. Connect power cord to a power outlet.

1.Use Ethernet cable to make connection from Ethernet port to the hub.

✳Use Category 5 Cross Cable when the Network Camera is directly connected to PC.
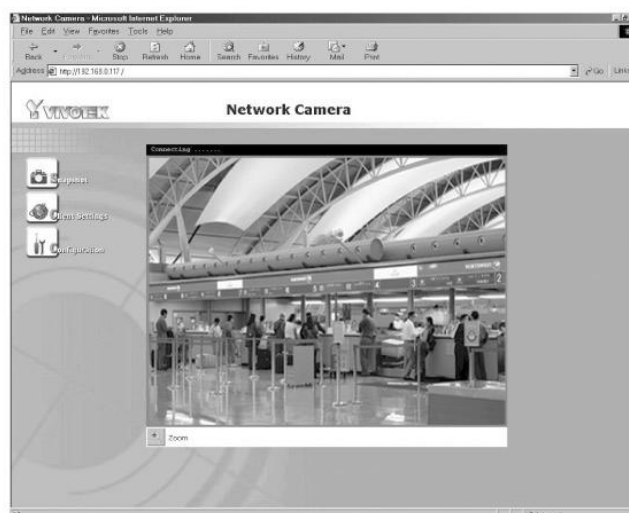

④ Assign IP address

1. Run the "Installation Wizard" under the Software Utility directory from software CD.

2. The program will search the servers or cameras on the same LAN.

3. After searching, the main installer window will pop up. Click on serial number that matches the one you just noted from ② Physical description

4. Click "Link to selected device(s)" to connect the Internet Explorer to the Network Camera.
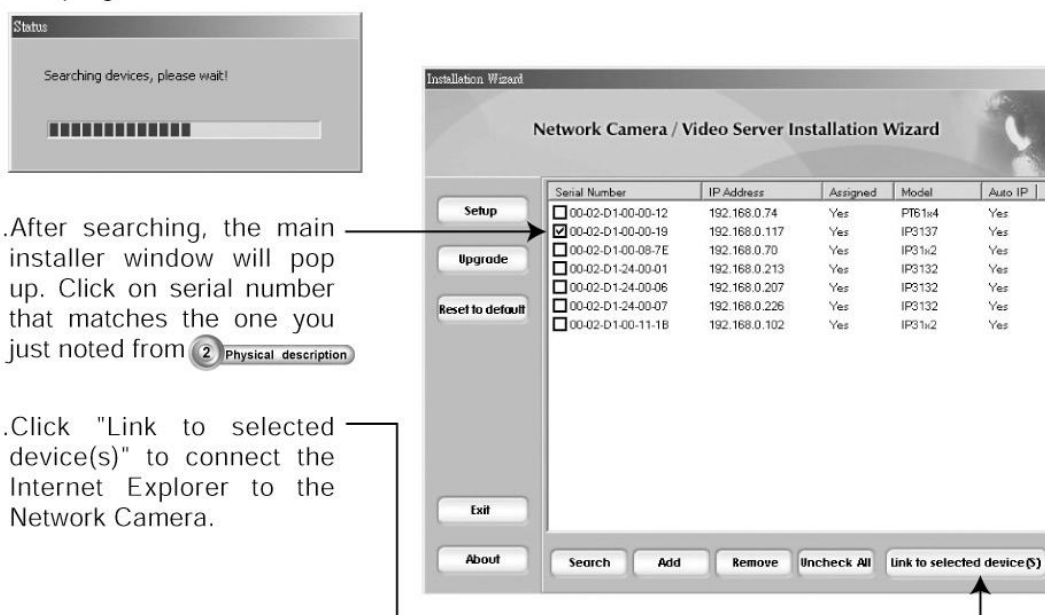

⑤ The Internet Explorer Connects to the Network Camera

## 6 Set up your wireless configuration for the Network Camera

1. Check the SSID currently set on your wireless access point (AP).

2. Go to IP3137's **Configuration > Network > WLAN Configuration**

3. Type in the SSID consistent with the setting on your AP.

4. Select the Wireless mode as "Infrastructure".

5. Click **Save**

<u>Note:</u>
1. SSID abbreviated from Service Set Identifier is the name assigned to the wireless network. The IP3137's factory SSID setting is set to "default".
2. Select "Ad-Hoc" wireless mode if you want the IP3137 to communicate without using an AP or wireless router.

For setup further configuration, please check user's manual on the software CD.
