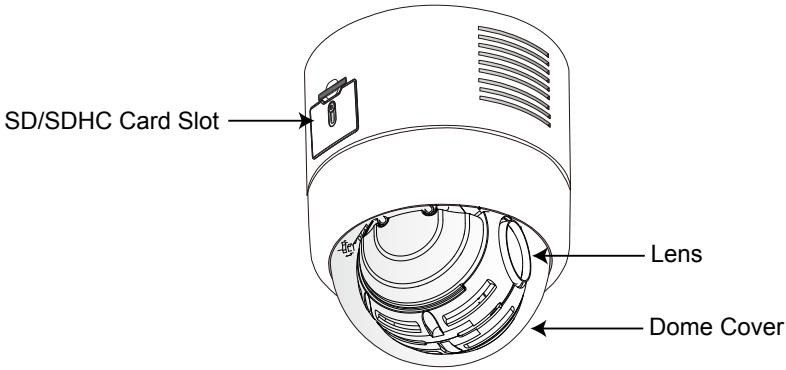
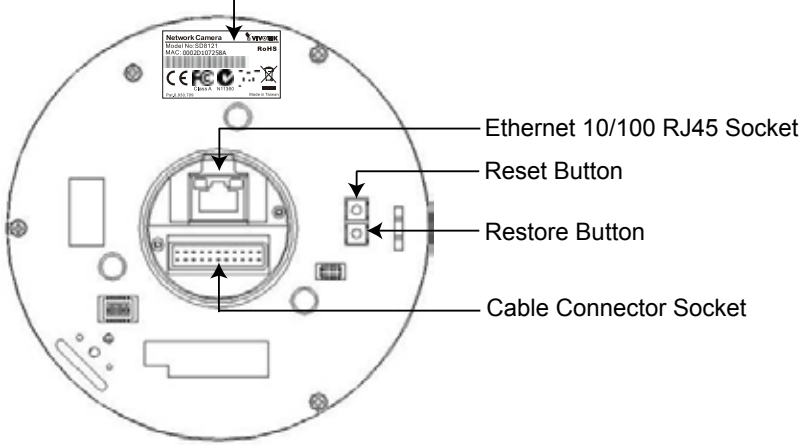
2 Physical Description

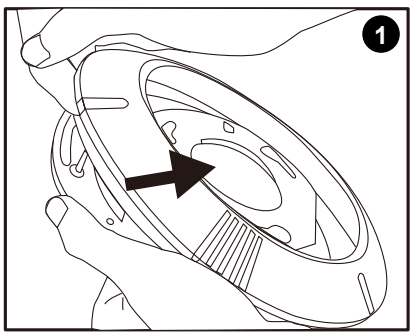


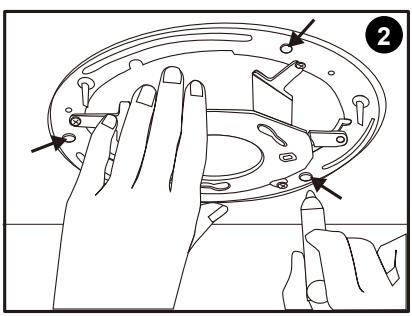
Record the MAC address before installing the camera.

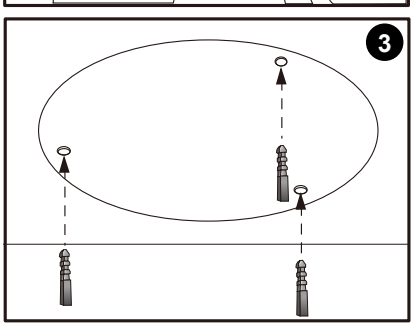


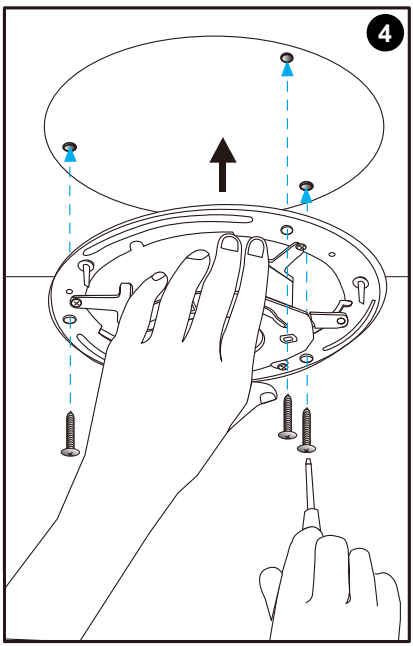
3 Hardware Installation

Follow the steps below to install the Network Camera to the ceiling:
1. Detach the Decoration Ring from the Hard Ceiling Mount Bracket.
2. Align the three holes on the Mount Bracket, mark the screws locations on the ceiling.
3. Drill three pilot holes into the ceilling and hammer the plastic anchors into the holes.
4. Fix the Mount Bracket with three screws.

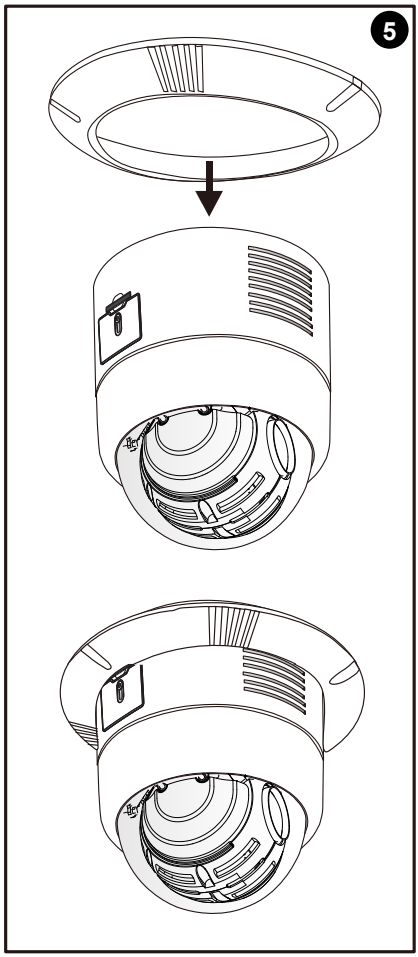


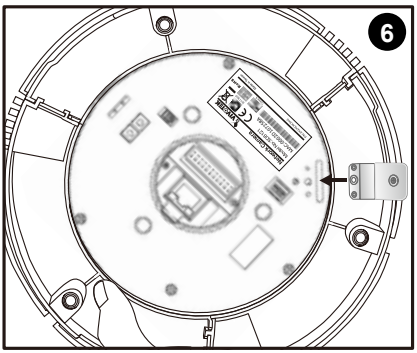


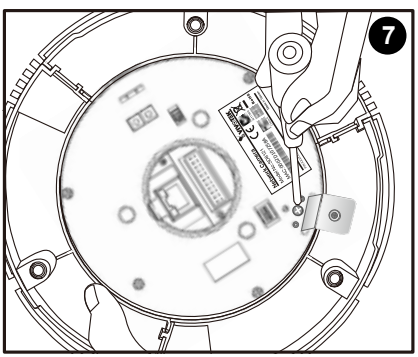




5. Put the decoration ring onto the dome body.
6. Insert the fixing plate into the groove as shown below.
7. Align the three holes to screw the fixing plate to the dome base.

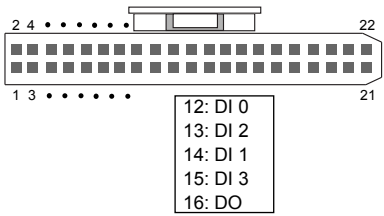


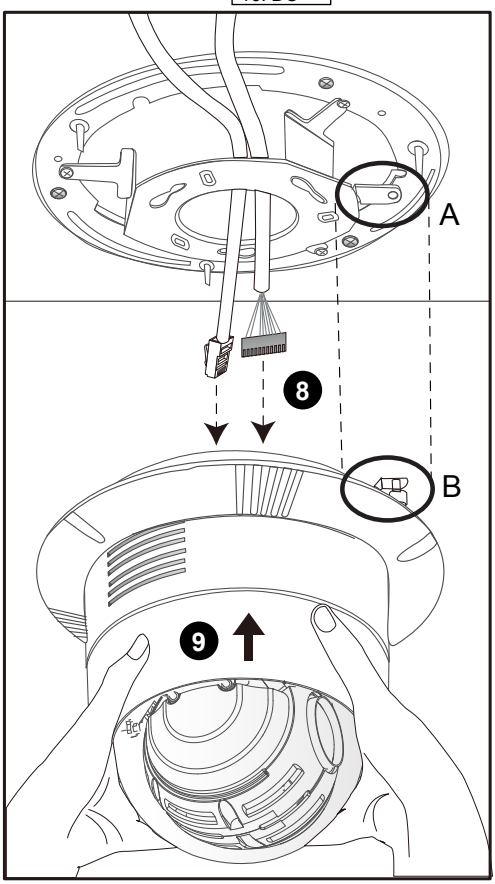


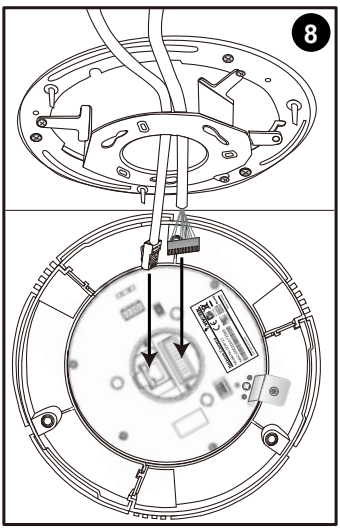


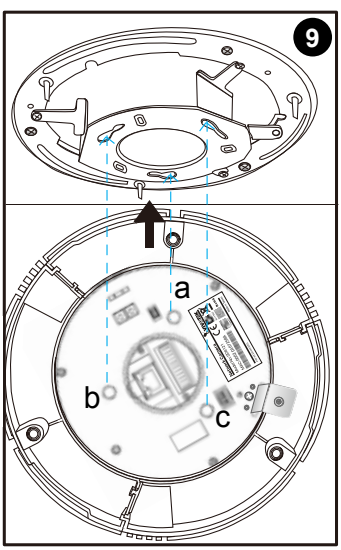
8. If you have external devices such as sensors and alarms, connect them to the general I/O terminal block. Then connect the cable connector and Ethernet cable to the dome base.
9. Align plate A and plate B, use hole a ~ c to hook the Network Camera on the ceiling mount bracket.

Pin Definitions of Cable Connector

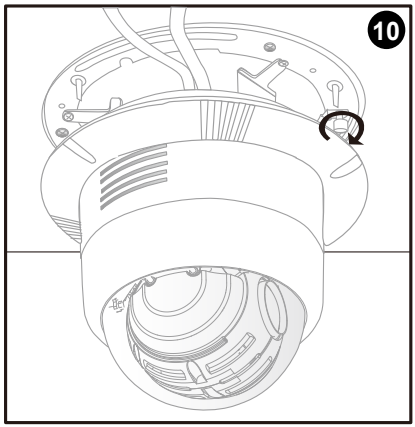


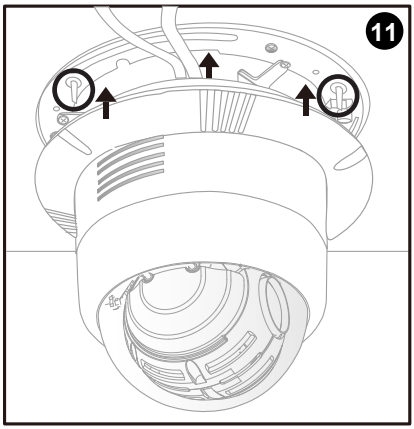




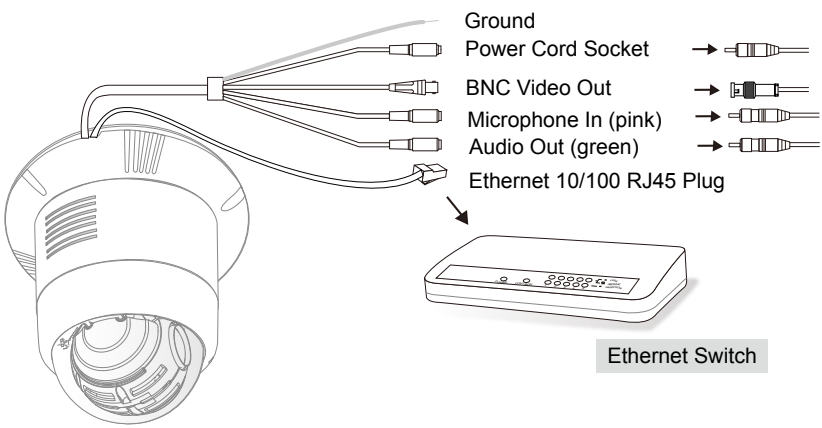


10. Tighten the screw on the fixing plate.
11. Align the three holes to mount the decoration ring.





12. Connect the cables and make the network deployment.



4 Assigning an IP Address

1. Install “Installation Wizard 2” from the Software Utility directory on the software CD.
2. The program will conduct an analysis of your network environment. After your network is analyzed, please click on the “Next” button to continue the program.

3. The program will search for VIVOTEK Video Receivers, Video Servers, and Network Cameras on the same LAN.
4. After searching, the main installer window will pop up. Click on the MAC that matches the one labeled on the bottom of your device to connect to the Network Camera via Internet Explorer.

5 Ready to Use

1. Access the Network Camera on the LAN.
2. Retrieve live video through a web browser or recording software.

For further setup, please refer to the user's manual on the software CD.
