— Restore default setting button

12VDC

COM

ETHERNET 10/100

COM port

RJ45 Ethernet 10/100 socket
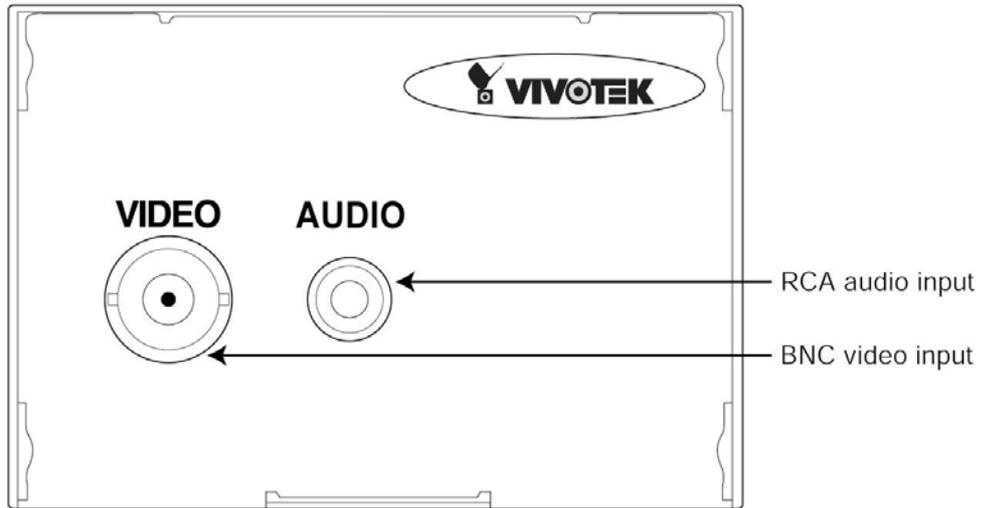

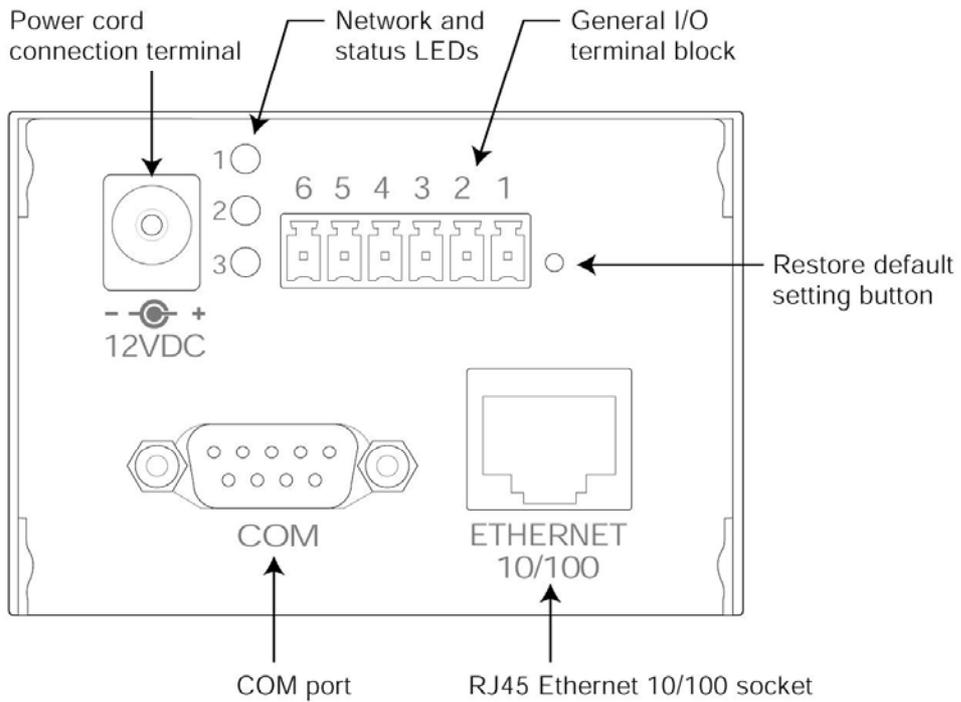

● **Install your Video Server to an Ethernet network**

1.Make video connection from the BNC video input to your camera

2.If you use PTZ camera, use the control cable to make connection from COM port to your camera

Front panel

3.Make audio connection from RCA audio input to ypur Line-Out audio source

4.Make Ethernet connection from Ethernet port on Video Server to the hub on the LAN

12VDC

COM

ETHERNET 10/100

6.Finally, connect power cord to a power outlet

5.If you have external devices such as sensors and alarms, make connection from I/O terminal block

Note : If you want to use modem or null modem connection , please refer to the user's manual

4 Assign IP address

A Note the serial number from the label on the unit.

Video Server

Model NO.:VS3102
MAC : 0002D1XXXXXX

C E FC

Made in Taiwan
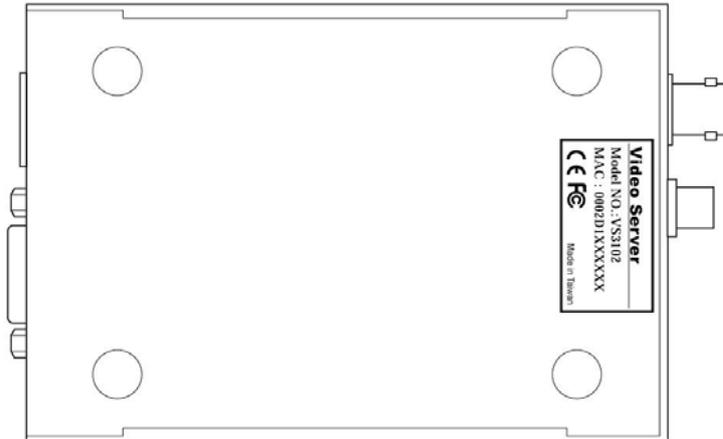

This serial number is same as Ethernet address,
for example: 0002D1000012=00-02-D1-00-00-12

B Assign IP address

● Using Installer program

1. Run the "Installation Wizard" under the Software Utility directory from software CD.

2. The program will search the servers or cameras on the same LAN.

Status

Searching devices, please wait!

▮▮▮▮▮▮▮▮▮▮▮▮▮
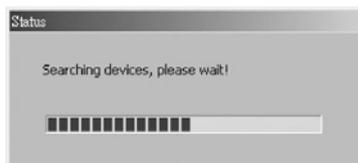

3. After searching, the main installer window will pop up. Click on serial number that matches the one you just noted from (4) Assign IP Address
